October 27, 2009

Dear Prospective Offeror:

REQUEST FOR PROPOSAL (RFP) NO. 110100, ADDENDUM 1  
WIND PROFILER  
RECOVERY ACT

This letter serves as Addendum No. 1 to the subject RFP that was issued on October 12, 2009.  
This Addendum provides a response to a question for clarification.

Except as provided herein, all terms and conditions of the referenced RFP remain unchanged and  
in full force and effect.

Offerors shall acknowledge receipt of this Addendum in accordance with the RFP section  
entitled "Amendments to RFP."

Sincerely,

  
Joe Burks  
Contracts Specialist

Response to Requests for Clarification  
PR 110100 Wind Profiler  
Addendum 1

1. QUESTION: In the Technical Specification section, page 2, under section 3, bullet 7, which reads "Operating system capable of responding to external input of desired beam pointing direction to enable motion control." We are interpreting this to mean that we will not provide an inertial measurement unit (IMU). Rather, as the line says, our system will use externally provided data regarding ship motion to then point the antenna.

**RESPONSE:** Correct, the radar does not need to come with its own Inertial Navigation System - those data will be provided externally.
