

# ER News Directory Structure

The files are templates. The links and anchors in the templates do not change from issue to issue, because the file names are not altered. Only the titles of the articles in the navigation bar change. The TOC for the current issue is duplicated as the index under the top-level directory, so the default URL ([www.pnl.gov/er\\_news/](http://www.pnl.gov/er_news/)) takes the reader to the current issue.
