Information System (FEMIS)**

System Administration Guide

for

FEMIS Version 1.4.7

May 26, 2000

**Prepared for the U.S. Department of Energy
under Contract DE-AC06-76RLO 1830**

Acknowledgment

The FEMIS product is being developed by the Pacific Northwest National Laboratory as part of the U.S. Army's Chemical Stockpile Emergency Preparedness Program (CSEPP).

This software and its documentation were produced with Government support under Contract Number DE-AC06-76RLO-1830 awarded by the United States Department of Energy. The Government retains a paid-up non-exclusive, irrevocable worldwide license to reproduce, prepare derivative works, perform publicly and display publicly by or for the Government, including the right to distribute to other Government contractors.

Disclaimer

This material was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor the United States Department of Energy, nor Battelle Memorial Institute, nor any of their employees, MAKES ANY WARRANTY, EXPRESSED OR IMPLIED, OR ASSUMES ANY LEGAL LIABILITY OR RESPONSIBILITY FOR THE ACCURACY, COMPLETENESS, OR USEFULNESS OF ANY INFORMATION, APPARATUS, PRODUCT, SOFTWARE, OR PROCESS DISCLOSED, OR REPRESENTS THAT ITS USE WOULD NOT INFRINGE PRIVATELY OWNED RIGHTS.

References to any specific commercial product, process or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply endorsement, recommendation, or favoring by the U.S. Army or Battelle.

The software has not been reviewed for export out of the U.S. A license or license exception may be required for export.

under Contract DE-AC06-76RLO 1830

Pacific Northwest National Laboratory
Richland, Washington 99352

Preface

The Federal Emergency Management System (FEMIS) is an emergency management planning and response tool. The following documents were developed to support system users.

This **FEMIS Data Management Guide** provides the information needed to manage the data used to support the administrative, user-environment, database management, and operational capabilities of FEMIS.

The **FEMIS Installation Guide** provides instructions for installing and configuring the FEMIS software package.

The **FEMIS System Administration Guide** provides information on FEMIS System Administrator activities as well as the utilities that are included with FEMIS.

The **FEMIS Release Notes** provide a description of what is new in the release, a list of known problems and workaround suggestions, and any information specific to this release that was not available when other documents were published.

The **FEMIS Bill of Materials** defines FEMIS hardware, software, and communication requirements.

The **FEMIS Online Help System** explains how to use the FEMIS program, which is designed to help civilian emergency management personnel to plan and respond to a Chemical Accident or Incident (CAI) Event at a military chemical stockpile.⁽¹⁾

(a) The FEMIS program is being developed by the Pacific Northwest National Laboratory as part of the U.S. Army Chemical Stockpile Emergency Preparedness Program (CSEPP). Pacific Northwest National Laboratory is operated for the U.S. Department of Energy by Battelle under Contract DE-AC06-76RLO 1830.

Contents

1.0	Overview.....	1-1
1.1	Point of Contact	1-2
1.2	Document Organization.....	1-2
1.3	Software Products.....	1-3
2.0	FEMIS Monitoring Tools.....	2-1
2.1	AutoRecovery	2-2
2.1.1	How to Execute AutoRecovery.....	2-2
2.1.2	Messaging Service	2-4
2.1.3	FEMIS Logging	2-4
2.1.4	FEMIS Log File Archive	2-4
2.1.5	Sending E-mail.....	2-4
2.1.6	AutoRecovery “Watchdog” Timeout Parameter.....	2-5
2.1.7	Dynamic Insertion/Deletion of Remote Server in Replication	2-5
2.1.8	AutoRecovery Events/Actions.....	2-6
2.1.9	Detecting System Problems with AutoRecovery.....	2-9
2.1.0	Using AutoRecovery.....	2-9
2.1.1	AutoRecovery Error Message.....	2-11
2.2	UNIX FEMIS Monitor	2-22
2.2.1	Background	2-22
2.2.2	How to Detect System Problems	2-23
2.2.3	UNIX FEMIS Monitor Configuration File	2-25
2.2.4	UNIX FEMIS Monitor Scripts.....	2-27
2.2.5	UNIX FEMIS Monitor Daemon Program	2-28
2.2.6	UNIX FEMIS Monitor Client Program	2-28
2.3	FEMISMon Watcher (FWATCH.EXE)	2-28
2.3.1	Notification Status	2-29
2.3.2	Menu Options	2-29
2.4	FEMIS Monitor PC (FMONPC.EXE).....	2-30
2.4.1	Replication Status	2-30
2.4.2	Options Menu	2-31
2.5	Network Monitor (WS_WATCH.EXE)	2-32
3.0	FEMIS Notification Service.....	3-1
3.1	UNIX Host Notification Service	3-1
3.1.1	UNIX Notification Service	3-1
3.1.1.1	Executable Binary Files	3-2
3.1.1.2	Configuration Data File	3-2
3.1.1.3	Service Port Data File	3-2
3.1.1.4	Protocol Numbers	3-2
3.1.1.5	Daemon Server Startup.....	3-3

3.1.2	Notification Server Configuration Options.....	3-3
3.1.2.1	Command-line Options.....	3-3
3.1.2.2	Clone Process in Background Option.....	3-4
3.1.2.3	Display Version Options.....	3-4
3.1.2.4	Diagnostic and Quiet Modes.....	3-4
3.1.2.5	Service Port Name Option	3-4
3.1.2.6	Service Port Environment Option.....	3-5
3.1.2.7	Display IP Address and Service Port.....	3-5
3.1.2.8	Enable Log Files	3-5
3.1.2.9	Nonstandard Port from Command Line.....	3-5
3.1.2.10	Connecting to Other EOC's Notification Server	3-6
3.1.2.11	Multiple Remote EOC Servers Limitation	3-6
3.1.2.12	Server to Server Connection	3-6
3.1.2.13	Which Service Port to Use.....	3-8
3.1.2.14	Enable Keep Alive	3-9
3.1.2.15	Registered and Unregistered Service Port	3-9
3.1.3	femis_event EVENT Configuration File	3-9
3.1.4	Notification Server Utilities	3-10
3.1.4.1	UNIX Client Application – fev.....	3-10
3.1.4.2	UNIX Client Command-line Options	3-11
3.1.4.3	Client ID Number	3-11
3.1.4.4	UNIX Client Protocol	3-11
3.1.4.5	UNIX Client Example	3-12
3.1.4.6	UNIX Client Diagnostics.....	3-13
3.1.4.7	UNIX Client Information Diagnostic \$i	3-13
3.1.4.8	UNIX Client Socket Connections Diagnostic \$s	3-15
3.1.4.9	UNIX Client Auxiliary Connect Information Diagnostic \$aux	3-16
3.1.4.10	UNIX Client Remote Servers Diagnostic \$rem.....	3-17
3.1.4.11	UNIX Client Event Board Diagnostic \$eve.....	3-17
3.1.4.12	UNIX Client Synchronize Action \$sync.....	3-18
3.1.4.13	Data Driven Notification Command Line Arguments.....	3-18
3.2	PC Notification Service	3-19
3.2.1	PC Notification Service Overview.....	3-19
3.2.1.1	Executable Binary Files	3-19
3.2.1.2	Notification Service Startup.....	3-20
3.2.2	PC Notification Service Configuration Options	3-20
3.2.2.1	Configuration Parameters	3-20
3.2.2.2	Notification Service Configuration File	3-20
3.2.2.3	Command-line Options.....	3-21
3.2.2.4	Environment Variables	3-21
3.2.2.5	Host Server Name and Port	3-21
3.2.3	PC Notification Service Operation	3-21
3.2.3.1	Notification Service Window	3-21
3.2.3.2	Lost Connections	3-22

3.2.4	PC Notification Test Client.....	3-23
3.2.4.1	PC Test Client – NOTITEST.EXE.....	3-23
3.2.4.2	PC Test Client Configuration	3-23
3.2.4.3	PC Test Client Command-line Options	3-23
3.2.4.4	PC Test Client Functions	3-23
3.2.4.5	PC Test Client Diagnostics.....	3-25
3.2.5	Notification Server Troubleshooting	3-25
3.2.5.1	Check Notification Server Active.....	3-25
3.2.5.2	Check Notification Server Communication.....	3-26
3.2.5.3	Aborting Notification Server	3-26
3.2.5.4	Fixing Notification Port.....	3-28
3.2.5.5	PC WinSock Errors.....	3-28
3.3	Starting/Stopping Notification Service.....	3-29
3.3.1	Starting Notification Service.....	3-29
3.3.2	Stopping Notification Service.....	3-30
3.4	Data Transfer Notification.....	3-30
3.4.1	Data Acknowledgement Notification Window.....	3-30
3.4.2	Data Acknowledgement Monitoring Window.....	3-30

Acronyms and Definitions

ACTS	Automated Computer Time Service
ANAD	Name of a FEMIS database (Anniston Depot)
APR	Project file format (ArcView)
CAI	Chemical Accident or Incident
COTS	Commercial-Off-The-Shelf
CPU	central processing unit
CSEPP	Chemical Stockpile Emergency Preparedness Program
CTOO	Name of a FEMIS database (Tooele County)
D2PC	Chemical wind dispersion model used in FEMIS
DAI	Data Acknowledgment Interface
DBMS	Database Management System
DDN	Data Driven Notification
DEI	Data Exchange Interface
DLL	Dynamic Linked Library
DNS	Domain Name Services
DRAM	Dynamic Random Access Memory
E-mail	electronic mail
EMIS	Emergency Management Information System
EOC	Emergency Operations Center
ESF	Emergency Support Function
ESIM	Evacuation SIMulation, part of Oak Ridge Evacuation Modeling System (OREMS)
FEMIS	Federal Emergency Management Information System
FTP	File Transfer Protocol
GB	gigabyte–billion bytes
GID	Group Identification number
GIS	geographic information system
GMT	Greenwich Mean Time
GPF	General Protection Fault
GPS	Global Positioning System
GUI	Graphical User Interface
HCL	Hardware Compatibility List
IBS	Integrated Baseline System
ICG	Oracle7 Installation & Configuration Guide Release 7.3.4
IDYNEV	Interactive DYNamic EVacuation
IANA	Internet Assigned Number Authority
IP	Internet Protocol
KB	kilobyte–thousand bytes
LAN	local area network
MB	megabyte–million bytes
Met	meteorological
MHz	megahertz–millions of cycles per second
NFS	Network File System

NIST	National Institute of Standards and Technology
NTP	Network Time Protocol
ODBC	Open Data Base Connectivity
OLE	Object Linking and Embedding
OREMS	Oak Ridge Evacuation Modeling System
PC	personal computer
PCI	Peripheral Component Interconnect (Intel)
PID	Process Identification number
PNNL	Pacific Northwest National Laboratory
RAM	Random Access Memory
RER	Remote Evacuee Registration
RDBMS	relational database management system
SMTP	Simple Mail Transfer Protocol
SQL	Structured Query Language
SQL script	Sequence of SQL statements that perform database operations
TCP/IP	Transmission Control Protocol/Internet Protocol
TEAD	Name of a FEMIS database (Tooele Army Depot)
TNS	Transparent Network Substrate
UDP	User Datagram Protocol
UID	User Identification number
UNIX	Generic name for the server operating system
UTM	Universal Transverse Mercator
UTST	Name of a FEMIS database (Utah State)
VB	Microsoft Visual Basic
VGA	Video Graphics Array
WAN	wide area network
WINS	Windows Internet Name Service
Windows NT	Microsoft Network Ope`rating System for Workstations
WinSock	Windows Sockets
WWV	NIST radio station broadcasting continuous time status
