

# MICROPRODUCTS BREAKTHROUGH INSTITUTE

A NATIONAL LABORATORY AND REGIONAL UNIVERSITY COLLABORATION

Oregon State University &  
Pacific Northwest National Laboratory  
proudly announce the creation of the  
**Microproducts Breakthrough Institute**

MBI is centered in Corvallis with extensive participation and support from staff and facilities at OSU and PNNL.

MBI was created to fuel a microproducts revolution and stimulate economic development in the Pacific Northwest by developing:

- Fabrication infrastructure
- Skills development
- New technologies and products

OSU and PNNL, leaders in energy, chemical, and biological systems miniaturization have joined to form MBI, partnering with industry and government. MBI conducts research and development and supports commercial growth by creating a new generation of regionally produced, technology-based products.

Pacific Northwest  
National Laboratory  
Operated by Battelle for the  
U.S. Department of Energy
