

Program Element IV: Hazard Prevention and Control

7. Medical Programs

Required Information:

Describe how the medical program is integrated with the safety and health program.

Describe the availability of both onsite and offsite medical services or physicians. Indicate the coverage provided by employees trained in first aid, CPR, and other paramedical skills, and indicate what type of training they have received. Address coverage on all shifts.

Describe how occupational health professionals are involved in routine hazard analysis, early recognition and treatment of illness and injury, and in limiting severity of harm.

Describe how the site addresses specific programs—e.g., hearing conservation, fitness testing for respirators, bioassay and/or whole body counting, and other required medical testing—under OSHA and DOE standards, such as those for lead, asbestos, and HAZWOPER. Describe how the medical program interacts with the industrial hygiene, health physics, and safety programs.

Additional Guidance:

Individual medical tests should not be attached, although aggregated results may be included. Similarly, forms may be included, as long as there are no personal identifiers present.

Describe the location and the accessibility of medical services. Maps, directions, and access times are valuable information, but are not required.

Applicant agrees that the required information is included and is correct to the best of their knowledge.
