

**Program Element III: Worksite Analysis**

**6. Accident Investigations**

*Required Information:*

Describe the system used to conduct accident and incident investigations.

Describe training and/or guidance given to investigators, provide criteria used for deciding which accidents/incidents will be investigated; and describe how near miss incidents are handled.

Describe the "lessons learned" process being used at the site, and demonstrate root cause analysis.

*Additional Guidance:*

Include a copy of a brief accident investigation report; however, do not include any DOE accident investigations.

Do not include supervisors' first report of injury.

Applicant agrees that the required information is included and is correct to the best of their knowledge.
