SBIR/STTR NEWS AND INFORMATION

- SBIR Phase I and Phase II Award Levels Adjusted by SBA

The National Institutes of Health (NIH) posted the following announcement on their SBIR/STTR News Flash Page (http://grants.nih.gov/grants/funding/sbirsttr_news.htm#20100331) on March 30, 2010:

The Small Business Administration (SBA) announced today, through the Federal Register (<http://edocket.access.gpo.gov/2010/2010-7018.htm>), a final amendment to the Small Business Innovation Research (SBIR) Program Policy Directive. This Amendment adjusts SBIR Phase I award levels from \$100,000 to \$150,000, and Phase II award levels from \$750,000 to \$1,000,000. The amendment also continues to provide participating agencies with an appropriate degree of flexibility in award size. Applicants submitting NIH SBIR Phase I or Phase II applications (new or resubmissions) targeting due dates on or after April 5, 2010, may base budget requests on these adjusted amounts. Note: This amendment only applies to SBIR, not to the Small Business Technology Transfer (STTR) program. However, for both programs, the award levels are statutory guidelines, not ceilings. Therefore, applicants are encouraged to propose a budget that is justified, reasonable and appropriate for completion of the research project. A desire to have more time to change the budget request will not be allowed as a valid reason for a late submission. Also, it will not be possible to increase the budget request after the submission. As always, applicants are encouraged to contact NIH program staff listed in the Funding Opportunity Announcement to discuss their scientific project and budget plans.

- SBA FY-10 FAST Program Announcement

The Small Business Administration (SBA) posted an announcement for their FY-10 Federal and State Technology Partnership (FAST) solicitation at http://www.sba.gov/aboutsba/sbaprograms/sbir/announce/SBA_FAST_PROGRAM.html on March 25, 2010.

As indicated in the solicitation:

“The purpose of the FAST program is to strengthen the technological competitiveness of small business concerns in every state. Congress has found that there is much variance within state technology programs

that foster economic development among small high-technology firms. Therefore, this program intends to improve the participation of small technology firms in the innovation and commercialization of new technology; thereby ensuring that the United States remains on the cutting edge of research and development in the highly competitive arena of science and technology.

The SBA estimates that it will issue up to 20 awards under the Announcement. The Federal award per state will not exceed \$100,000.”

Proposals need to be posted to www.grants.gov by 11:59PM EDT on May 10, 2010. For more information, contact Program Analysts Lisa Younger or Shirley Smith at FAST@sba.gov.
